ELECTRONIC TIMER
## adjustable pulse generator
suitable for solenoid valves

FEATURES

- *This electronic timer, which generates adjustable pulses, is particularly suited for automatic control of draining of an air dryer or compressor. Indeed, when energised, it can initiate operation of the solenoid valve for the time necessary for draining condensates at regular adjustable intervals*
- *Other applications include irrigation, air blasting etc.*
- *Fits directly to any solenoid valve with standardised ISO 4400 / DIN connection, between coil and power connector*

GENERAL / OPERATION

Converts a continuous power input into a succession of on-periods (ON), adjustable between 2 to 40 seconds and off-periods (OFF), adjustable between 0,5 to 45 minutes.
Input to timer

Output to solenoid valve

ON : adjustable between 2 and 40 seconds
OFF : adjustable between 0,5 and 45 minutes
