#### ► NOTES

- Sealings : EPDM = Ethylene-propylene elastomer
- 1 - Only for use with steam, consider following values: max pressure 3 bar (max temperature of fluid 140°C).
- 2 - The valves can operate in vacuum conditions at 0 bar absolute downstream.
- 3 - On request Z130A coil encapsulated in PET (Polyethylene terephthalate) in class "F" (+140°C): maximum fluid temperature +100°C, maximum ambient temperature +60°C.
- 4 - Model available on request only: ask for minimum quantity. Coils fitted with sealing gaskets underneath and on the upper part (see sectional view on the back). Particularly suitable to be used in places with high percentage of humidity.
